22 forecasters on the same test windows of nine populations. a, b: means over units, so larger units weigh more; c, d: the median unit. Bold: lowest in the column. Rows in the order of figure 2. ankyra-lite: the released recipe R (carrier trained from scratch with early stopping on the 93-day validation set, then 8 more epochs with the validation span returned; three seeds averaged; figure 1b). Linear-context: the TiDE implementation of the release, whose forecast is a linear map of the load context.

a RMSE (kW, mean over units)
