

The carrier's own forecast at the origin; ankyra-lite after anchoring (F) and after the origin-continuity layer (F', the delivered trajectory; c: the first three days). ankyra-lite 0.2.0: carrier recipe Rw (trained from scratch with early stopping on the 93-day validation set, then 8 more epochs with the validation span returned and each training window's loss weighted by the inverse-noise rule; six seeds averaged; figure 1b), the anchoring layer, the state rule and the origin-continuity layer; hourly errors score the delivered trajectory after that layer, energy, level and peak are read before it (readout rule A). Data: University of Cambridge estate building energy archive (CC BY 4.0). Window: the release's example window (UCam_Building_b37, origin 2011-09-01) lies before the Cambridge test set; this is the test window of the same building whose origin is nearest to it.
